WYOMING 2022

distributedha.sh

discreet hosting for privacy minded bitcoiners

at distributed hash we focus on decentralizing the bitcoin network via secure on and off grid non-managed hosting.

as bitcoiners and privacy enthusiasts ourselves, we have designed our systems to ensure the highest level of customer protection. our communications, tech stack, and internal record keeping are built around the sovereignty of your miners.

as the only privacy-oriented hosting company on the market, we are excited to serve you and your mining operation.

let's talk

our top concern is your privacy and the security of your machines.

please contact us via our website at www.distributedha.sh or directly at hosting@distributedha.sh to begin the conversation around hosting your miners. while rack space is constantly at a premium, we are expanding our operations across a variety of geographies and are happy to contact you when new space is available.

in the interest of stable and secure growth, we have chosen to not fund our operations via venture capital, pre-sale, or any other accounting trick that may compromise our customer base or their privacy and security.

we hope you will be patient as we are constantly adding new, distributed hash.
